Hallowell EMC Sold to Three Senior-Most Employees *(Release November 2023)*

W. Stetson Hallowell, owner of Hallowell Engineering and Manufacturing Corporation, Inc. has sold his business to three senior-most employees. The Massachusetts based company has been an industry leader in the sales of veterinary anesthesia ventilators for thirty-five years, with dealers in the US and abroad.

Robert Banister, a seventeen-year veteran of the company and acting Chief Executive Officer will be continuing his leadership role at the company. Since becoming Chief Operating Officer in 2020, Banister has led the company through considerable expansion, including the acquisition of the new location at 35 Downing Industrial Park in Pittsfield, Massachusetts, and the addition of CNC machinery to assist the company in manufacturing its own components for assemblies. Rob's expertise in both Business and Manufacturing Management have allowed for a seamless transition of ownership and continue to improve the company outlook.

Sam Zeygerman, Lead Engineering Executive, is a specialist in Large Animal Ventilation Design, Manufacturing and Repair. He was a member of the initial design team for Hallowell's Tafonius Large Animal Unit, has been with Hallowell since 2007, and is an integral part of the Research and Development of new products.

Nancy Palacios, Hallowell's Principal Technical Engineer, has ten years with Hallowell and has served as a department head leader of the 2002^{PRO} Series Assembly and Repair section for much of her time with the company. Nancy's department now comprises over 60% of Hallowell's sales.

Hallowell was incorporated in 1988 and has resided in Pittsfield, MA, USA since inception.
